

Cellulose fibres along with soluble fibre like MOS and FOS, help prevent hairball forming by assisting hair through the digestive tract.

The balanced levels of minerals especially magnesium, phosphorus and calcium significantly decreases the risk of Struvite crystal forming within the bladder. Proven trials are done yearly to ensure effectiveness.

Taurine is an amino-acid that helps the development of the heart and heart function.

Higher levels of Omega 3 & 6 allow for optimal skin health and a lustre coat.

The fortification of Taurine helps the development of eyesight and prevents cats from going blind as cats cannot produce this essential amino-acid by themselves.

High Omega 3 a level automatically allows for higher DHA & EPA levels that assist in brain and cognitive function.
